Profile

Third-year engineering student in computer science (5-year degree track), seeking a 6-month end-of-studies internship (PFE) starting February/March 2027. I aim to leverage my experience in software development, project management and coordination between business and technical teams within a demanding technology environment. Experience gained through project management assignments, an internship in a banking environment at Eurafric Information, and in the air transport sector. Proficient in Full Stack development (React, Laravel, Spring Boot), automation and AI tools (N8N, LLM), as well as Agile/Scrum methodologies and collaboration tools such as Jira.

Education

Engineering Degree in Computer Engineering (3rd year, 5-year track, in progress) — **Oct. 2025 – Sept. 2027**
IGA – Institut Supérieur du Génie Appliqué — *Casablanca, Morocco*

Bachelor's Degree in Computer Engineering — **Oct. 2024 – Aug. 2025**
IGA – Institut Supérieur du Génie Appliqué — *Casablanca, Morocco*

Professional Experience

Assistant Manager on Duty – Fleet Recovery Lead (AMOD) — **Sept. 2026 – Present**
Royal Air Maroc — *Nouaceur, Morocco*

- Real-time coordination between ground handling, maintenance and operations teams (Netline Ops++, Mercury ACARS, SITA), in the transport and logistics sector.
- Management of disruptions and operational contingencies under tight time constraints, with rigorous monitoring of performance indicators.

Software Engineer Intern — **Jul. 2026 – Aug. 2026**
Eurafric Information (IT subsidiary of BMCE Bank Group) — *Bouskoura, Morocco*

- Contributed to the design and development of a back-office console for managing IPO (Initial Public Offering) subscriptions, built on a 3-tier architecture (React / Spring Boot / MySQL).
- Helped implement security mechanisms: JWT authentication, password hashing (BCrypt), antivirus scanning (ClamAV) and file type validation (Apache Tika) for uploaded documents.
- Functional and acceptance-style (UAT-type) testing with Postman: valid, invalid and edge-case scenarios, to validate features before production release.
- Agile/Scrum methodology: sprint participation, ticket tracking in Jira, version control with GitLab.

AI & Automation Intern — **Jul. 2025 – Aug. 2025**
DXC Technology — *Rabat, Morocco*

- Gathered user requirements and designed an automation agent (N8N, MySQL, Google Docs API) handling admission and tuition requests, reducing response time from over 1 hour to under 5 minutes.
- Integrated LLM models and developed a chatbot and a Telegram bot to automate answers to common requests.

Project Coordinator — **May 2023 – Oct. 2023**
Digital Owner (Freelance) — *Remote*

- Point of contact between clients, designers and developers (Jira, Slack); translated business needs into actionable technical requirements.
- Tracked tasks, deadlines and feedback cycles, contributing to improved client satisfaction.

Projects

Internship Management Platform | *React 19, Laravel 10, N8N*
- Gathered requirements from 3 user profiles and designed the functional specification of an automated platform, reducing administrative processing time.

Scholar Network – Academic Social Platform | *React, Laravel, MySQL, LLM Integration*
- LinkedIn-style platform for universities with LLM-based content extraction and smart networking suggestions.

Discover Morocco 2030 – AI Tourism Platform | *Laravel, MySQL, N8N, Gemini API*
- Tourism promotion platform with an AI chatbot and an N8N/Gemini pipeline for automated answers and communication.

Library Management Platform | *Spring Boot, React, MySQL, Swagger*
- Real-time admin dashboard and notification system; API documented and tested with Swagger.

L'Épicerie Moderne – E-Commerce Platform | *Java, REST API, MySQL, React*
- E-commerce platform (catalog, cart, payment, order tracking) with a Java EE RESTful API and a MySQL database.

Skills

Methodology & Project Management: Agile/Scrum, Jira, Slack, Notion
Testing & Quality: Postman, Swagger
Development & Data: React, Laravel, Spring Boot, MySQL, Java, PHP, JavaScript
AI & Automation: N8N, LLM Integration
Tools: Git/GitLab, Office Suite

Certifications & Languages

Certifications:

- Claude 101 – Anthropic (2026)
- Introduction to Claude Cowork – Anthropic (2026)
- Foundations of Project Management – Google (2024)
- Agile Project Management – HP LIFE (2024)
- Career Essentials in Generative AI – Microsoft & LinkedIn (2024)
